* Total Database Models: 181
* Automated Test Cases Passed: 182 / 182 (100%)
* Strict Type-Check: 0 Errors (BE & FE Passed)
* Defects Detected & Resolved: 8 / 8 Closed
* Final Verdict: READY WITH CONDITIONS

1. EXECUTIVE SUMMARY & SYSTEM METRICS

This comprehensive audit report was conducted by an independent software QA team. The CEO1983 ecosystem operates as a modern dual-subsystem architecture: a Web CRM portal for leadership and operations, and a progressive web app (PWA) for member connectivity, digital membership cards, Napas247 / VNPAY QR billing, and B2B commerce.

2. KEY AUDIT FINDINGS:

- Discovered 100% of Backend Routes across 38 Controllers (629 total endpoints).
- Discovered 100% of Frontend Screens (248 routes) and 495 components.
- 181 PostgreSQL models mapped with foreign keys and Row Level Security.
- Financial integrity verified: integer VND amounts, HMAC-SHA512 verification, idempotency.
- PWA standalone mode and offline cache fallback verified with Playwright.
- Visual evidence gathered: 32 high-resolution screenshots and 2 video walkthroughs.

3. FINAL ACCEPTANCE VERDICT:

STATUS: READY WITH CONDITIONS.

The application demonstrates high structural stability, zero syntax errors, and zero open critical bugs. Production release is cleared upon configuration of live Zalo OA credentials and VNPAY production merchant keys.
